

Biting Policy (F1.1)

Biting is a difficult and uncomfortable topic for parents to deal with. If your child is the victim, you may feel angry and outraged. If your child is the teether, he may feel embarrassed or frustrated. Cheer up! Most young children who bite do so only for a short time. Paying close attention to the reasons (teething, frustration, attention, imitation, tiredness, independence, leadership, etc.) will help to find some useful solutions. Soon your child will have learned important new skills for communicating and getting along with others.

If a bite problem arises where a particular child regularly offends other children, we will immediately inform parents and discuss basic behavior modification techniques to implement. If a child bites three times in one day, and it happens twice in a week, that child may not be able to return to school the next day.

Families First Child Care Center reserves the right to suspend child care for any child whose behavior is detrimental to the overall well-being of other Children who receive care here

*See Disciplinary Statement for more information
